

ISO CAT I Ultrasound Certification

In accordance with ISO 18436-3 and 18436-8
32 Hours of course material + closed book exam
Optional 2 Hour Certification Exam Available*

SDT's ISO CAT I Ultrasound Certification Training is an opportunity to work with and learn from some of the world's most experienced ultrasound trainers and inspectors.

The 4 day course is an essential mix of theoretical knowledge and practical experience. Working from the Level 1 course guide, students are exposed to basic sound theory and how it is applied to the inspection disciplines demanded by an effective ultrasound program.

GOALS OF THIS COURSE:

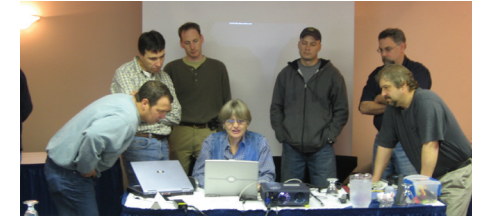

- Understanding the principles of ultrasound as applied to predictive maintenance
- Gaining knowledge on generic ultrasound equipment such as airborne and structure-borne sensors and their functions
- Explore data acquisition and storage options
- Analysing and trending data, utilizing time signal analysis and setting up statistical decibel alarms
- In depth study of ultrasound applications; leak detection, bearing lubrication and monitoring, steam trap and valve inspection, electrical systems analysis, hydraulic inspections and more.
- Assess equipment to determine severity priorities.
- Recommendations on implementing an ultrasound program at your facility

Cost per Attendee: \$2,899 AUD

Fee for (optional) Certification Exam*: \$300 AUD
